# Teacher Advice

## Topic 5: Our Dental Expo Plan

## Level: Years 3-4

## Purpose

The purpose of this topic is to support students to collaborate, plan, promote and activate a Dental Health Expo for a local audience.

## Activity

To commence have the class watch *Video 5.1 - Run an Expo to Educate Others.*

This video provides students with information about what they need to consider when planning to run and manage an event such as an Expo.

Once they have watched the video, have the class work together to complete *AS 5.1 - Our Dental Health Expo Management Plan.* This is an interactive activity that provides students with step-by-step process on how to collaborate, plan, promote and activate an event.

The plan asks the class to allocate student roles, and make decisions on the duration and location of their Expo, the size of their budget, who to invite as guests and volunteers, promotion and marketing, and to what extent they will use media to capture the Expo for viewing and listening after the event is over.

Letter and email templates and Student Media Crew videos providing students with advice on how to video, podcast and photograph the event, are also available as part of this activity.

## Teaching and Learning Resources

The following resources are provided to teachers to deliver this lesson...

1. Video 5.1 - Run an Expo to Educate Others
2. AS 5.1 - Our Dental Health Expo Management Plan
3. Letter and email templates
4. Student Media Crew videos (4 videos)

### Study: Health and Physical Education

### Key Learning: Personal, Social and Community Health

ACPPS036
Identify and practise strategies to promote health, safety and wellbeing
- Examining own eating pattern by researching THE AUSTRALIAN GUIDE TO HEALTHY EATING and identifying healthier food choices
- Proposing changes they can make to their daily routine

ACPPS039
Discuss and interpret health information and messages in the media and internet
- Accessing different sources of information
- Examining health messages from different sources and exploring choices, behaviours and outcomes conveyed in these messages
- Investigating how health messages influence decisions
